PROFESSIONAL SUMMARY

Full Stack Analyst Intern experienced in full-stack development, backend systems, and data platforms, with a focus on building scalable, secure, and high-performance solutions across applications, dashboards, and automation workflows.

EDUCATION

Saint Thomas School- Bangalore, India 10th Grade – KSEEB Scored 96.64%	2020
Whitefield Global PU College- Bangalore, India- PUC Karnataka State Board Scored 96.34%	2022
New Horizon College of Engineering-Bangalore, India B.E Information Science and Engineering CGPA 9.68	2026

INTERNSHIP

Full Stack Analyst Intern in People Analytics Team at Sequoia	April 2025 – February 2026
- Led end-to-end ownership of Platform utilization, Claims and Wellbeing vendor across Snowflake data models, Apache Airflow and dashboard layers, ensuring data accuracy and actionable business insights. - Implemented Row-Level Security (RLS) flags using Jinja templating for ATS Manager dashboard in Apache Superset, enabling secure and scalable role-based data access. - Designed and introduced an IS_EXECUTIVE flag to handle complex compensation job attributes, improving data clarity and supporting executive-level analytics in Apache Superset. Designed and delivered an end-to-end Wellbeing analytics dashboard for the Joshin vendor. - Optimized wellbeing analytics architecture by reducing datasets from 48 to 23 significantly improving dashboard performance, maintainability, and load efficiency in Apache Superset. - Built a Jinja-based POC for inline metric standardization, aligning all charts to the latest month's data; successfully deployed across three client vendors. - Developed automated chart data validation and Airflow DAG monitoring extraction with Apache Airflow and Superset dashboards, improving data reliability and boosting visualization team productivity; presented at Sequoia Tech Pulse Friday.	
Java Full Stack Associate at Bounteous x Accolite	February 2026 - Present
- Working on Java and Spring Boot for backend development and Angular for building dynamic, responsive user interfaces. Developing and integrating RESTful APIs with Angular frontend, ensuring smooth client-server communication and data flow. Applying OOP principles and full-stack development practices to build scalable and maintainable applications in a real-world development setup.	

PAPERS PUBLISHED

EduTrack: AI-Powered Adaptive Learning Platform	2025
- Published research paper on EduTrack in IEEE Xplore, highlighting the platform's AI-driven adaptive learning model and hybrid recommendation system. - Showcased the project's innovation in personalized education and its impact on improving student engagement and learning outcomes.	

PROJECTS

Java Agent-Based Database Monitoring System

2026

- Built a Java Agent using Byte Buddy bytecode instrumentation to intercept JDBC calls at runtime, capturing query execution time, active connections, and transaction metrics with zero code changes to the target application.
- Developed a real-time Angular dashboard integrated with a Spring Boot backend, visualizing live DB activity, latency trends and slow queries across multiple JVM instances.
- Technology Stack: Java Agent (Byte Buddy), Spring Boot, Angular, and PostgreSQL with REST API-driven metric aggregation and configurable alerting for high latency, error rates, and connection pool exhaustion.

EduTrack: AI-Powered Adaptive Learning Platform

2025

- Designed using MERN and Python (SVD + TF-IDF) to provide personalized learning through adaptive paths and smart video recommendations.
- Built student and teacher dashboards for progress tracking, quiz management, and collaborative note sharing.
- Integrated AI chatbot and ML-driven content recommendations to enhance interactivity and academic support.

SmartSpend AI – Intelligent Family Expense Analysis & Recommendation System

2025

- Built a full-stack platform that automatically fetches and parses transaction details from Gmail using the Google OAuth API and Regex-based extraction, categorizing income and expenses for all family members in real time.
- Designed an intelligent Dashboard to analyze total credits, debits, and spending patterns, providing personalized budget suggestions and balance insights tailored for common Indian households.
- Technology Stack: Spring Boot, PostgreSQL, Gmail API, and AngularJS with integrated Regex-based data extraction and automated financial analytics for seamless multi-user family expense tracking.

Wellness Wizard Fitness Web Application

2024

- Developed & Deployed "Wellness Wizard": An AI-driven platform providing personalized diet and workout recommendations, along with an AI-powered chatbot for user support, deployed on Render.(<https://wellness-wizard.onrender.com>).
- Integrated Advanced AI Features: Real-time chatbot support and gamified user engagement for better adherence. Technologies

SKILLS

- **Programming Languages:** Java, C and C++
- **Framework and libraries :**Spring Boot, Apache Airflow, AngularJS, Node.js
- **Tools and Platforms:** Apache superset, Metabase, Git and GitHub, VSCode, IntelliJ IDEA, Postman
- **Databases:** Snowflake, MySQL, MongoDB, PostgreSQL
- **Concepts and Methodologies:** Data Science Analytics and Engineering, Software Engineering and Project Management, Object Oriented Programming, Database Management Systems, REST APIs
- **Soft Skills:** Problem Solving and Analytical Skills, Presentation and Communication Skills, Adaptable and Fast Learner

CERTIFICATIONS

Java Masterclass (Udemy): Completed an in-depth course covering Java programming concepts, object-oriented principles, and real-world applications.

Leetcode streak of 150+ days: Had a leetcode streak score of 150+ and solved 250+ questions.

UVCE CodeStorm IMPETUS 24.0: Participated in a competitive coding event, enhancing problem-solving skills.

CODE NEURAL STATE LEVEL HACKATHON: Participated in a 24-hour hackathon organized by ACS College of Engineering, improving teamwork, problem-solving and rapid prototyping skills. April 2025-February 2026
